

Job Posting: Analyst/ Junior Engineer

Harper & Vedel are seeking candidates to positions in our Process Engineering Consultancy business (Pharma/Food ingredients/Nutraceuticals production).

This could be your dream job if you:

- Possess a mixture of specific knowledge, analytical skills, and ease of communication.
- Are looking to kick-start your career and learn-by-doing with the support and coaching of highly experienced colleagues.
- Are passionate about using your skills and your lateral leadership abilities to support lead Pharma and Life Science companies achieving their project and business goals.
- Thrive in a result-oriented environment, where you are supported and empowered to find the right way to deliver value to clients.
- Like to experience different type of projects, technologies, and approaches to work, all within the same job.
- Want to work in a small, dedicated company with a very flat organization and possibilities to influence your daily work.

Who are we:

At Harper & Vedel we support large well-known clients, as well as upcoming startups (mainly in Scandinavia) in areas such as:

- Decision science and support.
- Process design and technology selection.
- Optimisations of current production operations.
- Client-side engineering in revamps and green field projects (CapEx).

Our offices are in the Greater Copenhagen area, in close proximity to many of our clients.

What are we looking for:

We expect the candidates to fulfil the criteria below:

- Completed B.Sc., M.Sc., or Ph.D. in Chemical and Biochemical Engineering, Food Technology, Biotechnical Engineering, Pharmaceutical Design and Engineering or similar.
- Strong analytic skills and ability to structure open ended tasks.
- Strong communication skills and ability to formulate complex topics and results in reports and presentations.
- Very strong and demonstrated academic or professional achievements in one or more of the following topics:
 - (Bio)Chemical Unit Operations – including mass and energy balances.
 - Process Systems Engineering – preferably coupled with simulation expertise.
 - Operational analysis and optimisation.
 - Good Manufacturing Practices (GMP).
 - Aseptic/Sterile Manufacturing.
 - API Production.
 - Fill and Finish.
 - Medical Devices and Packaging.
- Oral and written proficiency in English. Working professional proficiency in Danish is a plus.
- Interest in the application of technical knowledge as a specialist services business.

At Harper & Vedel we offer:

- Attractive compensation plan including an analytic bonus system.
- Flexible working conditions.
- On the job training by leading specialists and experts.
- A flat and dynamic organization, with a highly skilled pool of co-workers.
- Opportunity to be part of some of the most interesting projects and activities in the market segment.
- Performance based career opportunities.

If interested, please submit CV and short cover letter to lene.holmskov@harper-vedel.com or contact me for more information (+45 2614 2350).
