

## Job Posting: Process Mechanical Engineer – Consultant/Principal Consultant

Harper & Vedel are seeking candidates with a Process Mechanical background, for our Process Engineering Consultancy business (Pharma/Food ingredients/Nutraceuticals production).

This could be your dream job if you:

- Are passionate about identifying, specifying, implementing and bringing into operation the right equipment technology for a given process task.
- Possess a mixture of specific knowledge, analytical skills and ease of communication.
- Thrive in a result-oriented environment, where you are supported and empowered to find the right way to deliver value to clients.
- Like to experience different type of projects, technologies and approaches to work, all within the same job.

---

### Who are we:

At Harper & Vedel we support large well-known clients, as well as upcoming startups (mainly in Scandinavia) in areas such as:

- Decision science and support.
- Process design and technology selection.
- Optimisations of current production operations.
- Client-side engineering in revamps and green field projects (CapEx).

Our offices are in the Greater Copenhagen area, in close proximity to many of our clients.

---

### What are we looking for:

We expect the candidates to fulfil the criteria below:

- Completed B.Sc., M.Sc., or Ph.D. in Chemical Engineering (technical), Process Systems Engineering, Biotechnical Engineering, Pharmaceutical Design and Engineering or similar.
- Some (preferably 4+) years of industrial experience in Pharma and/or Life Science sector.
- Experience in process technology, equipment selection design and engineering, commissioning and operation.
- Very strong and demonstrated academic or professional achievements in one or more of the following topics:
  - (Bio)Chemical Unit Operations – including mass and energy balances.
  - Process-mechanical design and engineering.
  - Operational analysis and optimisation.
  - Good Manufacturing Practices (GMP).
  - Aseptic/Sterile Manufacturing
  - API Production
  - Fill and Finish
  - Medical Devices and Packaging
- Oral and written proficiency in English. Working professional proficiency in Danish (oral) – preferably also written is a plus.
- Interest in the application of technical knowledge as a specialist services business.

**At Harper & Vedel we offer:**

- Attractive compensation plan including an analytic bonus system.
- Flexible working conditions.
- On the job training by leading specialists and experts.
- A flat and dynamic organization, with a highly skilled pool of co-workers.
- Opportunity to be part of some of the most interesting projects and activities in the market segment.
- Performance based career opportunities.

If interested, please submit CV and short cover letter to [lene.holmskov@harper-vedel.com](mailto:lene.holmskov@harper-vedel.com) or contact me for more information (+45 2614 2350).
